

PRODUCT OVERVIEW

Vehicle CCTV Systems

We bring the cameras, recording, connectivity and displays together around your vehicle. SURE handles equipment selection, integration, installation and ongoing maintenance for new buses and existing fleets.

Illustrative equipment. The final selection and specification are agreed for your vehicle.

Cameras where they matter

Plan internal, external, doorway and road views around the vehicle and the incidents you need to review.

Recording that fits the cameras

Match DVR or NVR hardware to analogue, AHD or IP cameras, required channels and the agreed storage period.

One working installation

Connect the recorder, router and displays, with the power supply, network settings and cable routes checked together.

SPECIFICATION CONVERSATION

What we agree with you

Cameras	Internal and external cameras, matched to the recorder and the coverage required.
DVR / NVR	Vehicle recorders with storage sized for camera count, image settings and retention requirements.
Router and data	Industrial mobile routers and SIM options for compatible live view, footage retrieval and remote support.
7-inch driver display	A compact landscape CCTV monitor in the driver's cab, positioned for the agreed camera views.
15-inch passenger display	A larger 4:3 CCTV monitor in the passenger seating area, with the mounting and camera feed agreed for the vehicle.
Integration and maintenance	New-build, retrofit and upgrades, including commissioning and support for the installed system.

Before installation

Confirm vehicle compatibility, mounting positions, power and network interfaces, commissioning checks, handover and ongoing support. Features depend on the selected equipment and service.

Plan your next step

Share your vehicles, current equipment and priorities with the SURE team.
