

PRODUCT OVERVIEW

Passenger Wi-Fi

SURE supplies and installs vehicle routers, antennas and network equipment, then configures the passenger service with your team. We can provide the SIM and data plan or work with your existing service.

Illustrative equipment. The final selection and specification are agreed for your vehicle.

Vehicle installation

Plan the router, Wi-Fi and mobile-network antennas, power supply and cable routes for each vehicle type.

A choice of mobile services

Leading-network SIMs, eSIMs and tri-network SIMs are available from SURE, subject to equipment and service compatibility.

Support beyond installation

Agree commissioning, fault support and maintenance for the equipment and services in your deployment.

SPECIFICATION CONVERSATION

What we agree with you

Router and antennas

4G or 5G options selected for your vehicles, passenger demand and routes.

SIM and data

SURE-supplied leading-network SIMs, eSIMs and tri-network SIMs, or your own compatible connection.

Passenger options

Choose branded access, content filtering, usage controls, cloud management and reporting. Features depend on the selected equipment and service.

Network integration

Agree how passenger access is separated from operational equipment and how each service uses the connection.

Service and running costs

Confirm data allowances, portal licences, filtering subscriptions and support scope before rollout.

Before installation

Confirm vehicle compatibility, mounting positions, power and network interfaces, commissioning checks, handover and ongoing support. Features depend on the selected equipment and service.

Plan your next step

Share your vehicles, current equipment and priorities with the SURE team.
